Tigo is dedicated to your success

More customers

- Install more sites in less time
- Serve more sites with the same equipment (shaded, mixed orientations, large & small, etc.)
- Provide the features your solar customers want and get more referrals

Lower operational expenses

- Single solution from commissioning through monitoring
- Simplify inventory management with a modular battery system
- Reduce truck rolls by remotely diagnosing issues

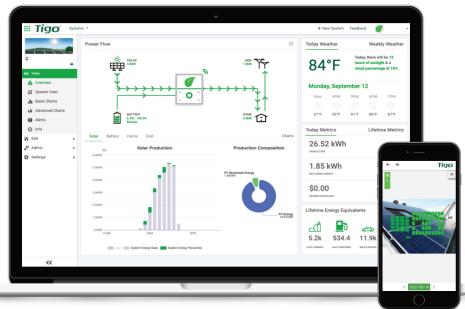

Unified by the Tigo Energy Intelligence (EI) platform

The most powerful solar commissioning and monitoring solution available

Reduce truck rolls and get peace of mind that your systems are performing the way you designed and installed it. Benefits of the Tigo Energy Intelligence platform include:

- Maximize site uptime Get real-time performance and safety alerts so you can quickly return the site to normal operation. More uptime = more energy
- Minimize O&M costs Detect system, string, and module level issues to remotely pinpoint and diagnose issues before rolling a truck. Fewer truck rolls = more savings.
- Enhance the customer experience Gain fleet level visibility using a single monitoring platform. Happier customers = more referrals.
- Commission the complete system in <10 minutes with the Tigo EI App.

EI Energy Storage Three Phase

Tigo EI (Energy Intelligence) is a complete energy storage system that easily expands to accommodate customer's ever changing needs. The Tigo EI Battery stacks 3kWh blocks, easily allowing up to 12kWh of total energy. The Tigo EI Link is the keystone of the EI System. It is the communications hub and points for all grid, inverter, PV and battery connections. When paired with Tigo TS4 Flex MLPE, module level monitoring, optimization, and fire safety features can all be achieved with Tigo communications already built in.

Features

- Powered by Tigo TS4 optimizers for maximizing flexibility with module design
- Supporting 150% oversized PV power
- Providing back-up, time of use, and energy management
- Fast Charging and high discharge current from battery
- Responding time less than 10ms
- Remote Monitoring and over the air upgrade
- Working in full load under extreme cold condition
- Fast installation and commissioning
- Industry leading warranty

Storage ready hybrid
